

## HARMONIOUS REMODELING OF YOUR FACE

TONIC AND PLUMP SKIN

BRIGHT COMPLEXION

### NATURAL PROCESS

Autologous Platelet Rich Plasma (A-PRP®) injections rely on a technique both simple and safe, using the regenerative and healing properties of platelets.

They have the ability to locally release growth factors, small molecules that act as messengers to initiate the process of skin regeneration.

From a small sample of blood, your physician isolates your platelets with a RegenACR® KIT for the preparation of Autologous Platelet Rich Plasma. The A-PRP is ready to be injected after only 10 minutes of processing.

Prepared from your own blood, it is a natural product; the risk of rejection or allergic reactions is minimized.

## A SAFE AND NATURAL TECHNIQUE

FOR VISIBLE IMPROVEMENT OF TEXTURE,  
LUMINESCENCE OF YOUR SKIN,  
REDUCTION OF WRINKLES AND FINE LINES,  
FADING OF DARK CIRCLES.

## INNOVATIVE SOLUTION

FOR HAIR LOSS (ALOPECIA, ALOPECIA AREATA),  
ACNE SCARS AND STRETCH MARKS.

## AN IDEAL SUPPLEMENT TO

LASER AND CHEMICAL PEEL TREATMENTS.

## FINE LINES AND SKIN QUALITY

The natural aging of your skin is due to an imbalance between the rate of destruction and renewal of cells and collagen.

By promoting the process of natural tissue regeneration, mesotherapy injections of A-PRP improve skin quality and smoothes fine lines of the face, decollete and hands.

## DARK CIRCLES

The eye area is a particularly fragile region in which may appear bluish coloration due to a microcirculation disorder, sometime associated with a darker area under the lower eyelid.

Growth factors present in A-PRP stimulate the micro-circulation around your eye, its brightness is improved and skin around the eyes recovers its tonicity.

RegenACR Plus

## SCARS

A-PRP injections are also an effective treatment of stretch, acne marks or for hypertrophic scars.

AFTER 3 treatments  
RegenACR Plus

## DEEP WRINKLES

Localized treatment by injecting a gel preparation of A-PRP restores harmony and proportions in the volumes of the face.

- *Nasolabial folds,*
- *Cheeks and jaws,*
- *Periorbital areas,*
- *Crow's feet,*
- *Area of the upper lip,*
- *Nose and forehead.*

## HAIRLOSS

A-PRP injections in the scalp stimulate bulb cells at base of the hair and the surrounding microcirculation.

Vitality, color and brightness of your hair are enhanced; their loss is slowed and their growth is activated.

## TREATMENT POST LASER OR CHEMICAL PEEL

Analgesic and anti-inflammatory effects of A-PRP help to fight the pain and significantly improve the speed of wound healing after laser or chemical peel treatments.
